REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

Claims 10-13 & 18-21 are allowable over the prior art of record, because the prior art is silent to a non-aqueous electrolyte secondary battery comprising a boronized graphite positive electrode and a separator interposed between electrodes of opposite polarity, in such a way that the periphery of the plane of the negative electrode facing to the positive electrode is being projected to the plane of the positive electrode, and is surrounded by the periphery of the plane of the positive electrode.

Claims 14-17 & 22-25 are allowable over the prior art of record, because the prior art is silent to a non-aqueous electrolyte secondary battery comprising a wound electrode assembly, wherein the positive electrode is a boronized graphite positive electrode and the negative electrode has a region within its innermost winding region with a first margin in the lengthwise direction facing the inner periphery of the winding part such that it projects from the end at the innermost winding region of the negative electrode, and a second margin in the lengthwise direction facing to the outer periphery of the winding part such that it projects from the end at the outermost winding region of the negative electrode, and a third margin and a fourth margin formed such that the ends in the

widthwise direction of the positive electrode project from both ends positioned in the widthwise direction of the negative electrode.

Conclusion

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
